

**APPENDIX H  
VIRGIN MOBILE  
GPS MAPPING**

**GPS MAPPING TERMS & CONDITIONS**

GPS Mapping is a service provided by Nokia and will incur additional data charges. To use the service you will need to have an open data session the cost of which will either be included in your data subscription package (if you have one) or incur our standard data charges of 1.5c per KB.

The GPS Mapping Service also includes an extra service where you can enter an agreement with Nokia to supply navigation or city guide services. If you purchase any of the additional services using a credit card, you will be providing these credit card details to Nokia and / or their service provider. You will still incur our standard data charges in respect of these services, in addition to any fees charged by Nokia.
